

On 3rd Nov G11 and G12 Economics and Biology students visited Citiponics urban farm in Jurong East to learn more about the application of aeroponics and hydroponics. This visit marked the beginning of a project to look into the viability in constructing a mini hydroponics at HWA. We thanked Mr. Teo, the founder of Citiponics project, for showing us the farm and explaining the operation of the aeroponics. Thank you Ms Sally for contacting Citiponics. We really learn the implication of the technology in agriculture and economics. Mr. Teo also promised to visit HWA soon to assess the possibility of having mini aeroponics in school campus.
