

On 8th and 9th Nov, the G11 and G12 Biology students organised **Marine Conservation exhibition** in partnership with WWF Singapore at Town Hall Village. Primary 6, middle and high school students visited the exhibition to learn about problems faced by the world in conserving sea turtles, coral reefs, sharks and other endangered marine species. We also discuss the impact of water pollution caused by fossil fuel extraction and oil slicks on marine ecosystems. Ms. Georgina from WWF Singapore delivered an intriguing **talk** on marine conservation to middle school students.

G11 and G12 Biology students
